## Next generation ZINCALUME® steel for the next generation of architect

ZINCALUME® steel has set a benchmark within Australian building for generations. So when we decided to raise the bar we made absolutely sure our product would perform beyond expectations. Our next generation ZINCALUME® steel has been developed and assessed over almost 20 years. And it has been proven in real world environments as well as accelerated testing. The result is next generation ZINCALUME® steel with patented Activate™ technology, **arriving mid 2013.**

It's more durable and more efficient than ever before. It has a smaller environmental footprint\*. And it's guaranteed to meet AS1397.

At BlueScope Steel we continually work to develop products that meet the changing needs of our built environment for generations to come. So you can be inspired to create with **next generation steel.**

1800 675 230

\*Compared to original ZINCALUME® steel (AZ150 coating) in all LCA environmental impact categories when used in Commercial & Industrial roofing applications. This improvement is the result of innovation in the metal coating formulation that delivers an increased lifespan while using fewer metal resources.

ZINCALUME® and BlueScope are registered trade marks and Activate™ is a trade mark of BlueScope Steel Limited. © 2012 BlueScope Steel Limited ABN 16 000 011 058. All rights reserved. ILM32689a8C
