**CleverDeck® composite decking
from NewTech™ is an environmentally sustainable
and virtually maintenance free timber replacement product,
marketed in Australia by Futurewood.**

At last a genuine cost effective alternative to rainforest timber with all of its associated environmental concerns and maintenance issues. Choose CleverDeck composite decking and be comfortable in the knowledge that you have made an economically sound decision that won't hurt the environment!

Check out these great features:

- 4 designer colours: Mahogany, Saltbush, Slate Grey and Walnut
- 2 sizes: 138mm wide x 23mm thick and 86mm wide x 23mm thick
- Made from 100% recycled cellulose (rice husks) and HDPE (old milk bottles)
- Resistant to Termites and White Ants
- Very low maintenance, fully finished and ready to install
- No knot holes or sap runs therefore less waste
- No splinters, cupping, warping, splitting or twisting
- Standard uniform 5.4 metre long lengths (custom lengths can be made to order)
- 10 year limited warranty
- Mould and Mildew resistant, low water absorption
- Easy to install with concealed fix NewTech deck clips*
- Double sided & slip resistant
- Won't rot

** NewTech-CleverDeck composite decking has specific installation requirements. Please refer to our website for a copy of our fixing guidelines.*

► This deck in East Doncaster, Victoria, is fitted with 138mm wide CleverDeck Mahogany boards that were used to replace an old rotting timber deck. The owners also added a cream coloured powder coated steel balustrade and polycarbonate roof to create a wonderfully classy, maintenance free outdoor room.

◀ These fashionable townhouses in Ringwood, Victoria, were fitted with 138mm Slate Grey CleverDeck boards in order to add an extra touch of sophistication to the finished product. The builder was also looking to avoid the risk of tannin bleed (that occurs with most hardwood decking) running from his first floor decks over his newly rendered and painted walls below and CleverDeck provided the perfect risk-free solution.

◀ This architect designed dwelling in Eaglemont, Victoria, was constructed using the finest materials, so CleverDeck 138mm wide Walnut boards were a natural choice for the outdoor entertaining area, shown here with an etched glass balustrade.

NEW

WEATHERED

Mahogany

Saltbush

Walnut

Slate Grey

The weathered effect occurs over the first 8 – 12 weeks that your deck is exposed to the elements. Colours shown are a printed representation only. Actual colour samples are available on request.
