PROJECT DETAILS

Supply, install and commission of 7
ASSA ABLOY operators

6x STA 8500 (ASSA ABLOY SL500) bi-parting,
sliding door operators with ADS-F/ADS-F
Intrusion Protection Systems

1x STA 8500-1 (SL500-1) Single sliding
door operator with door leaf by fabricator

Located 8km from Brisbane's CBD, 'Yeerongpilly Green' forms part of the new \$850 million development, showcasing both Woolworths and BWS as their anchor tenants. Developed by Hutchinson builders, ASSA ABLOY was approached by Fitout Glass and Aluminium to supply, install and commission 7 operators, driven by Woolworths specification.

Included in this specification is four main entrance doors, the pickup door, and the primary entrance to the BWS store encompassing ASSA ABLOY's SL500-2, ADS Intrusion Protection System, and the ADS-F door system.

Given the requirement for entrances to handle high-frequency entries and exits, a robust and reliable operator was essential. The SL500, capable of accommodating high usage without excessive wear on consumable components, translates into lower maintenance costs and minimised downtime.

All doors are designed to offer spacious clear openings while eliminating potential trap points, ensuring a safer and more purposeful solution. In terms of aesthetics, the modern framing system incorporates 9.52mm security laminated safety glass in both the ADS-F and ADS intrusion system. This choice not only enhances impact resistance but also maintains the striking visual appeal of the contemporary building design
