MakMax Alfresco Dining Shade Solutions

We Have Outdoor Dining Covered

Favoured by architects, designers, and developers, MakMax Architectural Umbrellas and Modular Shade Structures can be seen all over the world, enhancing outdoor dining and attracting the attention of passers-by.

Our durable shade solutions are built to withstand the harsh Australian environment, providing superior protection from direct sun and UV rays, as well as offering the longest life-span and lowest maintenance costs on the market.

The MakMax team believes in limitless possibilities and our design and engineering teams specialise in bringing you flexible and stylish design options to complement and enhance your alfresco dining areas.

When the comfort of your customers and patrons is a priority, a MakMax Architectural Umbrella or Modular Shade Structure is the perfect solution for alfresco dining.

MakMax Product Range

Shingle Inn Cafe, Brisbane QLD

CENTRA

The most popular and versatile model in the MakMax Architectural Umbrella range, Centra is the perfect entertainer - ideal for cafes, restaurants, hotels, pubs, sports clubs and bars.

Centra umbrella models are available in a range of sizes from 2.7m up to 5m.

Victoria Park Golf Club, Brisbane QLD

LEVA

The cantilevered pole on the Leva range of umbrellas allows for maximised use of space underneath the canopy. The Leva is perfect for alfresco dining applications, offering shelter without the need for a column through the table.

Leva umbrella models are available in two sizes - 2.7m and 3.2m.

The Rocks Market, Sydney NSW

PORTA

The Porta umbrella is collapsible, portable and ideal for applications where persistent wind is not a factor.

Small and light, Porta is great for street furniture, as well as cafes, restaurants and bars without a permanent alfresco area.

The Porta umbrella is 2.1m.

The Street alfresco dining, Westfield Chermerside QLD

MONACO

Monaco Modulares are umbrella-style, permanent shade structures and well suited permanent installations for dining and entertainment precincts. Available with a central or cantilever column, Monaco Modulares are extremely versatile.

Monaco Modulares range in size from 3m right up to 12m.

The Island Brewhouse, Perth WA

PAVILION

The Pavilion Modular Structure has perimeter columns in each corner, providing clear access under the full canopy area.

The perimeter columns have a lower foundation load compared to the Monaco and other central column structures, making Pavilion easier to install on existing slabs and ideal for integrating guttering and blinds.

Pavilion Modulares range in size from 4m right up to 12m.

TECHNICAL SPECIFICATIONS

Engineering & Design	Premium quality Architectural Umbrellas and Modular Shade Structures designed to suit all major dining and entertainment specifications.
Steelwork	The steel frame employs tubular steel components finished premium architectural paint-protection system.
Membrane	» Mehler FR700N, long-life, 100% UV stabilised, waterproof, architectural-grade PVC coated polyester fabric with a PVDF finish to both sides. » A range of colour options available using Mehler Valmex FR580 and Serge Ferrari Soltis 502.

Quality Control	Complete manufacture and assembly in house means full control of product standards.

MakMax Design Flexibility

CUSTOMISATION & ACCESSORIES

MakMax Architectural Umbrellas and Modular Shade Structures all offer the design flexibility required to meet the most challenging project brief.

Flexibility is a hallmark of the MakMax Range.

- » In addition to a wide range of standard shapes and sizes, we can adapt most of our designs to fit the required space or design aesthetic.
- » Add colour to your structure - both fabric and steel.
- » Include LED lighting & heating options.
- » Link structures together to create a larger single canopy area.
- » Add or include gutters, downpipes and roll-down blinds for increased weather protection.
- » A range of ground fixing options are available for our versatile Centra Architectural Umbrella Range; pavement sockets, deck brackets and planter boxes.

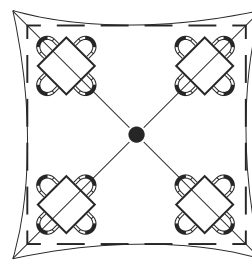

Customs House, Hobart TAS

LINEAR EDGE

Increase your usable space with a Linear Edge model on the Monaco or Pavilion Modular Shade Structures.

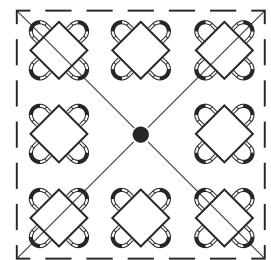

Ideal for alfresco dining, a straight edge means more seating under the canopy. A fixed, straight-edge also adds the ability to attach guttering or roll-down blinds, making the structure even more adaptable to the environment.

CONTOUR EDGE

6 Metre Canopy
29sqm of cover

LINEAR EDGE

6 Metre Canopy
36sqm of cover (26% more cover)

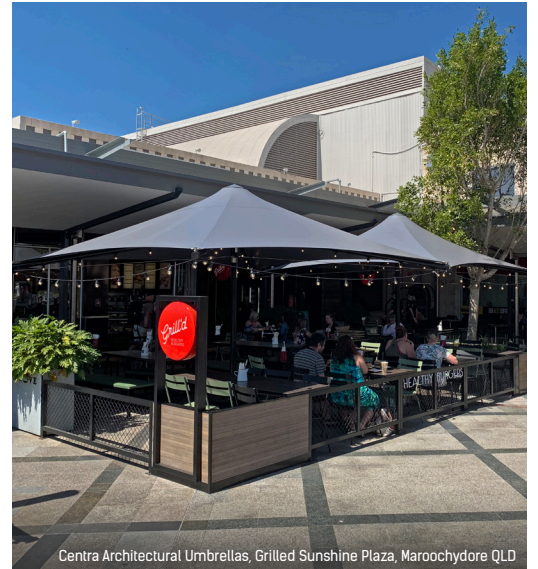

King Street Wharf, Sydney NSW

MakMax Alfresco Dining Shade Solutions

Linked Monaco with Linear Edge, Salamanca Place, Hobart TAS

Centra Architectural Umbrellas, Grilled Sunshine Plaza, Maroochydore QLD

Infrared Heaters for year-round alfresco dining, SkyCity Adelaide, SA

Architectural Umbrellas are available in a wide-range of colours, Palm Beach Cafe, Rockingham WA

Monaco Modularity with custom bird-protection, Opera Bar, Sydney NSW
